The City Health Office advocates caution anew as dengue cases in the City increased in the past months.

Based on data from the City Health Office, dengue cases for the months of April and May were significantly higher, registering 130 and 188 cases, respectively, as opposed to 97 and 127 cases reported last year for the same time period.

For June, there are already 90 reported dengue cases. A total of 161 cases were documented for June 2016.
