---

The city continues efforts to implement its solid waste management plan in cooperation with local government agencies and barangays.

Public Services Officer Rodrigo Pagotaisidro of the Office of the City Environment and Natural Resources (OCENR) affirmed that implementation of Ordinance 2016-176, also known as the solid waste management ordinance, is ongoing.

Kicking off 2018, the OCENR initiated a clean-up of the central business district (CBD) and the main public market on January 1. Aside from the clean-up, Pagotaisidro said flushing of the main market was carried out for health and sanitation.
